

Laboratory Connectivity Services

Today's Labs Don't Have it Easy

Running an analytical laboratory in today's complex and fast paced environment you know how challenging it can be to manage:

- Hardware and software compatibility
- Unreliable network connections
- Limited data storage capacity
- Keeping your systems and security settings up-to-date

The productive potential of your lab is lurking behind these challenges.

Realize Your Lab's Full Potential

SCIEX Laboratory Connectivity Services is here to help your lab maximize its potential. By scheduling an appointment, you will receive an onsite assessment by a SCIEX connectivity expert who will assess your current infrastructure readiness including hardware, firmware, and software. Upon review, you will receive recommendations for optimal LC-MS communication, informatics, and peripheral connections across your existing network.

A Lab Setup Assessment of systems and software will identify and troubleshoot connectivity issues related to these common areas:

- LC-MS instrumentation communication
- Software and firmware setup
- Acquisition and processing PC workstations
- Compatibility between software
- Communication and automation with LC systems
- Data storage
- Security settings
- LIMS Integration

Common Issues Addressed

LC-MS Connection

Struggling to connect a SCIEX mass spectrometer with another vendor's LC—losing valuable lab hours/days.

Compatibility

Experiencing compatibility issues with software and unable to connect to network for data storage.

Security

Requested by IT department to reinforce network security settings for LC-MS data, but lacks knowledge/resources.

Uniquely Qualified and Experienced.

Each member of our Lab Connectivity Services team has over 10 years of experience in analytical labs and working with complex setups. All SCIEX engineers undergo a 4-step training program and are re-certified every 2 years to stay up-to-date on our complete product line. We can help you unlock the productive potential in your lab by applying the same principles we use in our own labs.
